

# LRUE SCHOOL BOARD REPORT

## African Stories

Sixth graders had a special visit from Dr. Tucker, who told many stories about Africa. With these students studying Africa in Geography class and making their own postcards about different countries, it was great that Dr. Tucker was able to visit and tell all about his life while living in Africa. He brought with him several artifacts to show the students. They very much enjoyed the stories.

## CAREER DAY AT THE UPPER

LRUE held a Career Day on Friday, May 4. Each grade level had 6-7 speakers, which were parents of our students. We had a variety of career fields introduced to our students, such as a pediatrician, personal trainer, President of Import Co, veterinarian, surgical technician, civil engineer for the railroad, and several more. It was a great experience for the students to be introduced to all the different work fields. A big THANK YOU to our counselor, Julie Watson, for organizing the Career Day.

## Upcoming Events:

- May
